Breakout room prompts (15 minutes)

With your study groups. . .

1. Between the FiveThirtyEight and The Economist election forecasts, which one seems better to you? Any better ones out there?
2. Share something you found (a) <u>interesting</u> and something you found (b) <u>confusing</u> while updating your blogs last week.
3. Use `popvote_1948-2016.csv` to generate one useful descriptive statistic about incumbency (note: `prev_admin` indicates whether the candidate *served in a previous administration*)
